

VIBE™ is listed in the PDR

(Physicians' Desk Reference) as having the highest certified Oxygen Radical Absorbance Capacity (ORAC) rating.

THIS YEAR, PDR® WILL PROVIDE COMPLIMENTARY VOLUMES TO:

- 200,400 primary care physicians
- 62,000 to retail pharmacies
- 61,300 to other healthcare providers

PDR® is without doubt the most trusted reference in the health care community.

- 99% of Physicians verify facts with the PDR® before prescribing unfamiliar products.
- 95% of all physicians refer to the Physicians' Desk Reference when in need of prescribing information.
- More than 61% of Physicians surveyed said the PDR® for Nonprescription Drugs and Dietary Supplements does impact their product recommendations.

PDR® has provided complimentary copies of its books to every practicing physician in the USA for the past 54 years. Physicians alone reference it 246 million times per year!

PDR® is the most trusted resource for drug information within the healthcare industry. It is usually one of the first reference books purchased by students of healthcare professions and has become the prescribing guide for the entire healthcare community.

PDR® recognized a growing need for a resource of non-promotional information

on over-the-counter medications and dietary supplements, so the Physicians Desk Reference for Nonprescription Drugs and Dietary Supplements was created. This book provides a vehicle through which virtually 100% of the most influential recommenders of dietary products can be reached throughout the year.

The power of this book can be demonstrated with this final statistic:

In a survey of 135 physicians and 162 pharmacists, 83 of the physicians and 65 of the pharmacists indicated that the PDR® for Nonprescription Drugs and Dietary Supplements does impact their product recommendations.
